Instructions for Accessing Modules on UC Learning Services (IC, AST, SPH)

The following modules are accessed via the following link:

https://nursing.ucsfmedicalcenter.org/sites/g/files/tkssra2366/f/Combined%20Test%20%20Module%20Reference%20-RNs.pdf

Scroll down to the section labeled 'Mandatory Modules for Registered Nurses' and complete the following modules:

- UC Cyber Security Awareness Fundamentals

- UC Sexual Violence and Sexual Harassment Prevention Training for Non-Supervisory Staff

- UCSF Safe Patient Handling Training V1.0

- Workplace Violence Prevention in Healthcare

- General Compliance Briefing: University of California Ethical Values and Conduct

- Annual Safety Training (blood safety, environment of care, etc.)

- Infection Control Training for Ancillary Staff (Annual)

- Pathway Wayfinding Training Video

- COVID -19 Prevention

*Since changes to the modules can occur at any time, the UCSF recommended method for ensuring completion of the correct modules is to return to the link above and launch each module from that page. It will require you to log into the UC Learning Center with your employee ID each time, but this is the best way to ensure you're not taking an outdated/incorrect module.

Below are some helpful tips:

- Ignore the modules that are listed on your home page in UC Learning Center. Use the links above or on the Dept of Nursing Orientation Page. The modules listed are the most requested for the entire facility and may not actually apply to you. While they may have similar titles, they may be completely different or outdated. Please only access the modules using the instructions above.
- If you encounter technical issues within the UC Learning Center, please feel free to contact UCSF Tech Support at (415) 514-4100.
- Make sure that modules you've completed are not still under 'In Process' status. This occurs if you exit a module too soon, so make sure you see the message that informs you it is okay to close the window.
